

Description

Push mount nylon cable ties are a natural choice for many applications due to their versatility and ease of installation in addition to their low price point. Nylon Cable Ties have virtually limitless applications for just about every industry. Suitable for most applications, our push mount cable ties have a continuous working temperature of -40°F to 185°F and can support a maximum weight of 50lbs. Ideal for use in situations where mounting and bundling is required. All cable ties feature smooth rounded edges making these cable ties easy on the hands, in addition to a finely spaced gear rack allowing for exact adjustment ensuring a snug fit. Comprised of 6/6 Nylon with a compact molecular structure provides better weathering and sunlight resistance, higher melting point, superior colorfastness and excellent abrasion resistance creating a high quality, dependable cable tie with natural high resistance to insects, fungi, animals, molds, mildew, rot and many chemicals.
